

H326

Automated Piranha (High Power) LED Sorting Machine

H326 developed with advanced technology and stable mechanical design, the sorting bins has been greatly enhanced. Handler equipped with user-friendly operating interface to perform the real-time monitoring of binning result. The RGB lighting indicator also shows the operation status of system. In addition, handler could be connected with T650. The instrument supported high-speed and great accuracy & repeatability. After receiving the signal from instrumnet, H326 would finish binning Process rapidly and correctly.

Key Features

- **Tube In & Tube Out** –
Sorting bins more than H320, available 132 bins let users can sort Piranha LED more flexible.
- **Diversity of measuring** –
H326 provided option to choose different measuemnet. Integrating Sphere, or Optical Probe, or both will do.
- **User-friendly operating interface** –
Equipped touch panel and test instrument's LCD to perform the real-time monitoring of binning result.
- **Exact orientation** –
Framework of H326 follows H320. They can make the positioning of high power LED more accurate to avoid the error in measurement.
- **Easy maintenanc** –
Modularization design let users can easily change the jigs for various Piranha LEDs under test and reduce maintenance cost.

Pecifications

Throughput	Max. 4K PPH (with measruement time < 120 ms)
Bin Number	132 Bins (Tube Loaders)
Dimensions	1,850 (W) * 1,250 (D) * 1,750(H) mm
Air Pressure	5 Kg/cm ²
Power	AC 110V / 60 Hz ; AC 220V / 50 Hz
