

H362 Automated High Power LED Sorting Machine

H362 is an automated sorting machine to classify High Power LED efficiently. It is available 66 bins for loading and with buffers at unload section to prevent stopping during production.

H362 can connect the instrument to sort DUT into different bins rapidly and precisely. Moreover, the modularization design let users can easily change the jigs for various High Power LEDs under test and reduce maintenance cost.

Key Features

- **Convenient Tube in / Tube out** : Users only have to put the tubes in loading and unloading station and H362 will load and sort DUT automatically.
- **User-friendly operating interface** : Equipped touch panel to perform the real-time monitoring of binning result.

Specifications

Throughput	Max. 5K PPH (with measurement time < 150 msec)
Bin Number	66 Bins (Tube Loaders)
Dimensions	1,160(W) x 1,850(L) x 1,650(H) mm
Air Pressure	5 Kg / cm ²
Power	AC 220V / 50 Hz

Notes : All specifications are subject to change without notice
