

H530 Automated Top View SMD LED Sorting Machine

H530 Top View SMD LED Automatic Sorter is a new model specially designed by Chang-Yu Technology for SMD LED. It uses more advanced and stable transmission mechanism, which, together with testing apparatus develop by Chang-Yu, enable faster and reliable testing. H530 uses 5.4-inch touch-control color LCD to monitor the status of each material bin. The system employs a set of Circular Vibration turntable and Linear Vibration track for feeding material, which is to be snatched by a specially-designed nozzle before being sent to test stations. The tested material will be sent to the material dispensing station, where it will be put into different Bin, depending on the test results done by H530. Its red, yellow and green light indicates the operation status of the machine. [H530 also comes with replaceable fixtures and feeder that can be used with material of different specifications.]

Key Features

- Applicable for side view no-lens SMD LED.
- Could combine with T750 tester.(Optional)Could combine with T750 tester.(Optional)

Specifications

Applicable DUTs	Various Top View SMD LED	Throughput	Type 0808, 1206, 0603 : Max. 16K PPH (with measurement time < 100 msec) Type 3020, 3528 : Max. 15K PPH (with measurement time < 100 msec) Type 5050 : Max. 10K PPH (with measurement time < 140 msec)
DUT Supply	Parts Feeder		
DUT Direction	Polarity test and rotation, to ensure that the direction. (for PLCC Type)		
Testing Atation	1		
Bin Number	130 Bins		
Dimensions	1,300(L) x 960(W) x 1,800(H) mm		
Air Pressure	5 Kg / cm ²		
Power Supply	AC 220V / 50 Hz		

Notes : All specifications are subject to change without notice
